

CAPSTONE

**HIGH PERFORMANCE, LOW SHEEN
NATURAL LOOK WITH SUPERIOR PROTECTION**

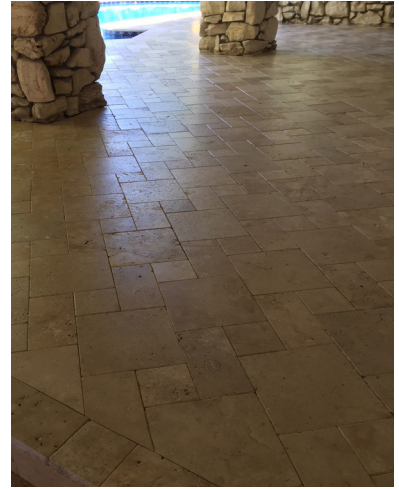

Capstone is a high performance, long lasting, thin film sealer for ceramic, porcelain, all natural stone, or concrete. Use Capstone for interior or exterior applications.

Performance

Capstone was designed for demanding high traffic areas. Capstone is highly resistant to scratch, mar, heavy foot traffic and resists soiling, keeping your surface looking clean longer. It is formulated for high chemical resistance and is resistant to all automotive fluids and tire staining.

Natural

Capstone has a very natural appearance, you barely know it is there. Capstone provides protection without high shine.

No Diamond Grinding

No need to grind the floor, before or after, with Capstone. In addition, unlike diamond polishing, Capstone is stain and chemical resistant.

Easy Application

Apply two very thin coats of Capstone easily with a flat micro fiber mop.

High Coverage Rate

On smooth, nonporous concrete, ceramic, or stone coverage rate is between 3200-3400 SF per gallon.

Minimal Downtime

Between coats, allow one hour dry time.

Walls or Floors

Capstone can be used to seal vertical or horizontal surfaces. Capstone is suitable in any area to brighten the natural beauty of the surface without adding shine.
