# CAPSTONE

## SUPERIOR PROTECTION - NATURAL LOOK

Grocery stores are perhaps one of the most demanding areas for floor finishes. High traffic with concentrated wear areas, combined with sand, salt, rain water, food spills, and grocery carts destroy the floor. Capstone provides the protection required in the high demanding areas of a grocery store. Apply Capstone for a high performance, long lasting finish on ceramic, porcelain, all natural stone, or concrete.

### Natural

A micro-thin film finish, Capstone provides protection with a very natural appearance. Capstone will enhance the natural beauty of the surface, providing protection without high build and high shine.

### Wear Resistance

Capstone was designed for demanding high traffic areas and problem areas such as, entrances, pivot points, and check-out lanes. Capstone is the solution finish, providing high resistant to scratch, scuff, mar, and heavy foot traffic.

### Stain & Chemical Resistance

Food spills are not a problem. Standard finishes and diamond polished floors cannot withstand many food spills. Capstone is formulated for high chemical resistance. Acidic food spills do not damage Capstone, resistant to mustard, wine, pickle juice, soda and more. Daily clean up is easy.

### No Polishing

No need to polish the floor, ever. Apply Capstone according to instructions. Clean as required.

### Easy Cleaning

Stains and soil do not penetrate the surface, making cleaning fast and efficient.

### Fast and Easy - Minimal Downtime

Flat mop on two very thin (3200+ SF/gal) coats of Capstone, dry one hour between and after 2nd coat. Return to service, fast!

### Rest rooms Too!

Capstone can also be used to seal rest room floors. Capstone is suitable in any area to protect and brighten the natural beauty of the hard surface. Using Capstone will save on maintenance spending and will aid in keeping the store looking great!
