SCEPTER RESTORER - PROTECTOR

LUXURY VINYL FLOORS (LVT) have made great strides in durability and appearance, quickly becoming a number one choice for flooring, both institutional and consumer use. However, at some point, LVT can appear worn and tired. Scepter is answer to renew and revive LVT floors.

RESTORE

Restore your luxury vinyl (LVT) floors. Scepter was designed for demanding high traffic areas. Scepter is highly resistant to scratch, mar, and heavy foot traffic.

Worn LVT Floor

NATURAL

Scepter has a very natural low sheen look, providing protection and restoration resembling the matted appearance of new luxury vinyl floors.

EASY APPLICATION

Apply two very thin coats of Scepter easily with a flat micro fiber mop.

HIGH COVERAGE RATE

2800-3200 SF per gallon, depending upon texture of the floor.

MINIMAL DOWN TIME - FAST DRY

Between coats, allow one hour dry time. No time for two coats, no problem, come back later to finish with the second coat for maximum protection.

LVT, LAMINENTS, OR LINOLEUM

Scepter can be used to re-seal and beautify manufactured floor surfaces. Scepter is suitable in any area to brighten the natural beauty of the surface.

EASY CLEANING

A fresh restorer coat will keep the floor looking great, resisting soiling, and easy to clean.
